II. Discussion of Recommendations

A. Amount of Rate Increase

Proposed rates over the next 3 years are designed to increase Revenue from Sales by \$2,536,650 representing an overall increase of 10.0% from adjusted 2025 year projected revenues of \$25,387,211.

The increase is designed to take place over a 3-year period with approximately a 7.1% increase in 2026, 1.7% increase in 2027, and 1% in 2028 year. Individual consumers may realize a rate change above or below this amount depending upon the class of service and usage characteristics."

C. Cost Allocation

Electric costs and revenue requirements are allocated to rate groups in Section D. Summarized below are results of the allocation as well as rate increase percentages under proposed 2026 rates. Margins have been allocated on an operating margin as a percent of revenue basis. Rate increases are recommended to bring rate classes more in line with the cost of service without excessive customer dislocation to any group.
